ALUMINIUM ADHESIVE ALUMINIUM TAPE 2026

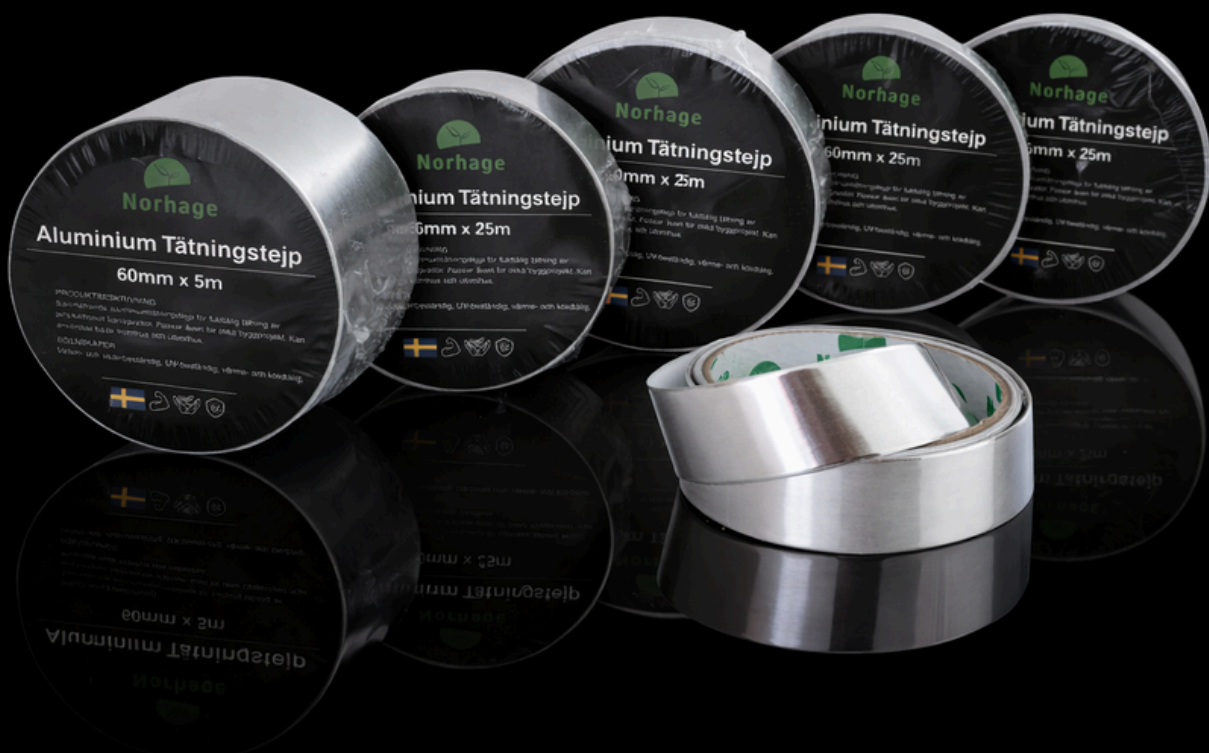

Who we are

We are a wholesale supplier of high-performance aluminium foil tape, built on more than 10 years of experience in polycarbonate and industrial greenhouse solutions.

As polycarbonate specialists, we understand the material, the installation process, and the long-term challenges that affect sheet performance, appearance, and warranty coverage. This knowledge allowed us to develop a product range designed not simply as an accessory, but as an essential part of a professional polycarbonate system.

Our goal is to offer wholesale partners a solution they can trust – one that combines technical value, commercial potential, and dependable quality.

@NORHAGEINDUSTRI

Built by polycarbonate experts

Our aluminium foil tape was created from real market experience.

After working with polycarbonate sheets for many years, we saw the same problem repeated again and again: sheets were often installed without proper channel protection, which led to condensation, dust, dirt contamination, reduced visual quality, and unnecessary warranty issues.

Because we come from the polycarbonate industry itself, we understand why proper preparation matters. We know that correct sealing is not a minor detail – it is part of responsible installation practice and long-term product performance.

That is why our tape range was developed by people who understand the full system, not just the tape itself.

SEALING MATTERS

Proper aluminium foil tape helps protect polycarbonate channels from condensation, dust, dirt, insects, and moisture-related contamination. It is an essential part of correct sheet preparation and helps create a cleaner, longer-lasting, and more professional installation result.

ALSO SUITABLE

For use in HVAC duct sealing, insulation joint sealing, vapor barrier applications, pipe wrapping, refrigeration line fixing, and general sealing or repair on metal and insulation surfaces.

THICKNESS

55 MIKRON

Ensures reliable sealing performance and durability.

Test method - PSTC-133 / ASTM D3652

PEEL STRENGTH

13 N/ **25** MM

Indicates strong adhesion to the surface.

Test method - PSTC-101 / ASTM D3330

TENSILE STRENGTH

35 N/ **25** MM

Shows resistance to tearing under tension.

Test method - PSTC-131 / ASTM D3759

ELONGATION

3 %

Indicates a rigid material with low stretch and good shape retention.

Test method - PSTC-131 / ASTM D3759

SERVICE TEMPERATURE

≤ **+65** °C

Suitable operating temperature range during use.

Value for wholesale partners

Wholesale buyers do not only need a product – they need a solution that supports business growth.

Our aluminium foil tapes help suppliers offer a more complete polycarbonate system while also creating real commercial value.

They allow distributors and resellers to improve their product offering, strengthen customer trust, and reduce avoidable service issues after the sale.

For wholesale partners, this means:

- a technically relevant add-on for polycarbonate sales
- competitive pricing and dependable quality
- stronger margins through a meaningful complementary product
- fewer preventable complaints and warranty-related issues
- a more professional and complete offer to the customer

In simple terms, our tapes help turn polycarbonate sales into a more complete, profitable, and lower-risk business.

REDUCE WARRANTY AND SERVICE ISSUES

Incorrect sheet preparation can cause avoidable performance issues and may affect warranty coverage.

Using the right sealing tape helps reduce after-sales questions, warranty claims, and customer dissatisfaction.

Our wholesale Promise

We offer a product that combines reliable quality, technical relevance, and commercial value. Developed for the needs of the polycarbonate market, our solution supports both installation requirements and the business goals of distributors, resellers, and other wholesale partners. As polycarbonate experts, we know that wholesale customers need a solution they can trust, with consistent quality and clear technical purpose.

Our aluminium foil tapes help partners provide a more complete and professional system while supporting performance, reputation, and customer satisfaction. By choosing our solution, wholesale partners benefit from reduced risk, greater confidence in the final installation, and a more reliable customer experience. We are committed to delivering a product that performs well in practice and helps create lasting business value.
